

HIGH SCHOOLERS — IN 12 WEEKS, WITH AI

BUILD SOMETHING REAL.

A **live online course** where you build a **real product with AI**, take it **live on the internet**, and go get your **first customers** — no coding required.

LIVE · SMALL GROUPS · ONLINE

No coding. AI does the how — the real skill is taste: knowing what's worth making, and shipping it. The edge isn't a degree; it's **what you can build.**

What you'll do

- ✓ Find a real problem & build a product with AI
- ✓ Take it live — real people can use it (and buy)
- ✓ Learn to grow it: a funnel, the metrics, real customers
- ✓ Present a capstone & graduate with a certificate
